

### Your Online Life: Simplified

As a password manager, LastPass will remember all your passwords, login to websites on your behalf, and effortlessly create new passwords for you. For easy access to your passwords no matter where you're working, download LastPass to every desktop, laptop, smartphone and tablet.

### How LastPass Works

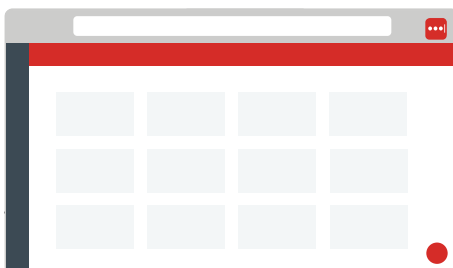

Use the same username and master password to login to LastPass on all your devices. Everything you save is automatically backed up and synced wherever you login.

#### 1. The LastPass Extension

Install the LastPass extension in any browser toolbar and click the extension to login.

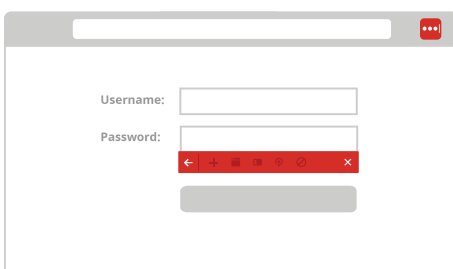

- The extension is red when you're signed in and gray when you're signed out.
- Launch your vault from the extension to manage your passwords at any time.
- Always install the extension for the fastest browsing experience with LastPass.

#### 2. Your LastPass Vault

Everything you store in LastPass can be viewed and managed from your LastPass vault.

- Search, edit, share, and delete passwords
- Update settings for your LastPass account
- Add Secure Notes to store more than passwords - like WiFi logins, software license keys, membership IDs and insurance cards.

#### 3. The In-Field Icons

As you visit websites, LastPass inserts clickable icons into fields for quick access to your passwords.

- **Save A Password** : Capture a new login after you enter the username and password.
- **Choose from Multiple Passwords** : See any stored accounts for a website & choose from multiple stored accounts.
- **Generate a Password** : Create a random password as you sign up for a new account or update an old password.
- **Fill a Form** : Select a Form Fill profile to instantly complete any shipping, billing, or registration forms.
